

GENERAL LEDGER BATCH IMPORT

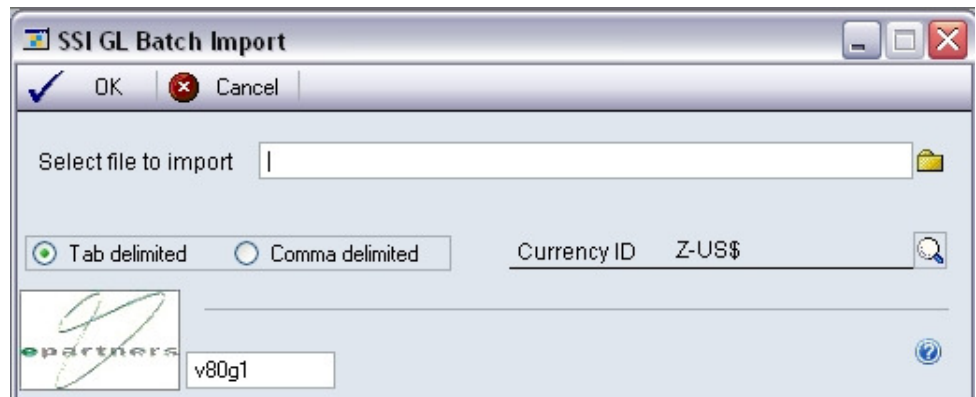

CORE FINANCIALS

WHAT IS *GL BATCH IMPORT*?

Signature Series' GL BATCH IMPORT lets the user easily and efficiently create journal entries in General Ledger by allowing them to import GL Batches automatically. The user is able to import an entire batch of transactions – creating separate journal entries for each individual transaction – and import reversing transactions.

WHO WOULD BENEFIT FROM THIS PRODUCT?

SS' GL BATCH IMPORT is ideal for organizations that are, or would be, using Great Plains financials and have a need to automatically generate journal entries by importing GL batches from one source to another. The import format is a simple ASCII file format and is controlled through a process requiring user-intervention. If a more real-time import is desired, then an eConnect-based solution is advisable and the exERPts - Data Manager for eConnect product should be considered.

HOW WOULD THE CUSTOMER BENEFIT?

Customers using *SS' GL BATCH IMPORT* would benefit by saving time and money due to simple, cost effective means of integrations while reducing the margin of error from duplicate entry.

WHAT OTHER SOFTWARE MUST BE INSTALLED IN ORDER TO UTILIZE THIS SERVICE?

Additional software necessary to benefit from *SS' GL BATCH IMPORT* would include Great Plains Version 7.5 or greater.
