Annual renewal based on 18% or 25% of the product's list price will be assessed at the time of product purchase (please refer to our SigSeries Enhancement and Support Program Overview for further information). It is our goal to align the customer with their Microsoft renewal period, so we will prorate fees accordingly. Annual renewals will be assessed upon expiration of the initial enhancement plan based upon the list price at time of purchase. In the event the enhancement plan lapses, client will be responsible for the late charges associated as indicated in the same program overview.

\* Batch Fixer is not inclusive among the enhancement renewal policy. To upgrade Batch Fixer, the client is required to repurchase the solution at the current list price.

All prices are in US dollars. Prices are good through 6/30/2010 and are subject to change. All sales are final.

For product evaluation and/or ordering please visit our self-serve site at <http://selfservice.epartnersolutions.com>.
